$\qquad$ -
(1) $2+1+4+3$
(2) $\mathbf{2 0 0}+\mathbf{1 0 0}+\mathbf{4 0}+\mathbf{3}$
(3) $2,000+150+40+3$
(4) $2,000+100+40+3$
$272 \div$ $\qquad$ $=2 \times 4$
(1) 6
(2) 9
(3) 8
(4) 12

3 Divide 63 by 6 . The remainder is $\qquad$ .
(1) 1
(2) 2
(3) 3
(4) 4
4. Which of the following is not the equivalent fraction of $\frac{1}{2}$ ?
(1) $\frac{7}{12}$
(2) $\frac{11}{22}$
(3) $\frac{5}{10}$
(4) $\frac{6}{12}$

5 Express $\frac{4}{18}$ in its simplest form.
(1) $\frac{1}{4}$
(2) $\frac{2}{3}$
(3) $\frac{2}{9}$
(4) $\frac{1}{3}$

6 The total mass of 2 similar bags of candy is 10 kg . Find the total mass of 8 such bags of candy.

(a) 20 kg
(b) 80 kg
(c) 40 kg
(d) 50 kg

7 The rectangle below is made up of two identical squares.
(a) What is the length of the rectangle?
(b) What is the area of the rectangle?

8 Javier has 2,343 books. Susan has 589 more books than Javier. How many books do they have altogether?
